## **DETAILED ACTION**

### ***Drawings***

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

The abstract of the disclosure is objected to because it is recommended that it be on a separate page and less than 150 words. Correction is required. See MPEP § 608.01(b).

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2817

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35, 42, 46, 47, 48, 49,50, 51, 58,62, 63,64,65, and 66 are rejected under 35 U.S.C. 102(b) as being anticipated by Hwang et al(US 6,346,838).

The reference by Hwang et al shows the PLL/synthesizer, see abstract figure and figure 6 for the tapped delay line structure, The delay line(series of delay elements) being at the input of the PLL so that it compensates for the jitter prior to the non-linearities/distortion/noise of the PLL components inherently including the PFD(26). The output of the delay line is fed to the PFD and the output of the VCO(24) is sent to the delay(34). A divider(16) is shown.

#### ***Allowable Subject Matter***

Claims 36-41,43,44,45,52-57,59-61 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arnold Kinkead whose telephone number is 571-272-1763. The examiner can normally be reached on Mon-Thurs:8:00am-6:30pm.
